2021

**Welcome to Graff Cattle and Tumbling T Angus,**

**Well here we are off to a New Year. We hope that your families are healthy and well as we meet the challenges before us.**

**The past twelve months have been interesting to say the least in all aspects of life but what we know for sure is that we do have input and control on our side for each of our cattle operations . Throughout the Covid-19 lockdowns, the consumer expanded consumption of beef and have acquired taste for other than fast food. Beef is a winner! We are lucky to be on the winning Beef Team as the coaches picking out our players to make this tasty dinner for others to consume.**

**As of this date the fed cattle and feeder futures are above the last several years level, fueled by lower heifer replacement inventory and increased world demand so be prepared to capture our fair share whether it is the calf or backgrounded cattle or cattle meeting the harvest endpoint.**

**This year's sale offering you will see a couple new sires along with our established proven A.I. herd bulls. The genetics available this year and projecting forward will influence the profitability and sustainability of your beef and grass operation.**

**We invite you to view the bulls prior to the sale date either in person or on our webpage. We are always open to let you come view the bulls in person early to help social distance. Hope to see or hear from you! Thank you!**

**Amy Cell**

**308-289-3366**

Please be aware that there is limited cell coverage at the place. For sale day bids or to contact Chuck or Trevor on sale day, you will need to use the sale day land lines numbers listed above!

## Herd Health

Veterinary service by the Animal Clinic. All bulls have been tested and are guaranteed breeders. Herd health vaccination program recommendations have been followed. January & February bulls were semen evaluated prior to the sale and to further insure you, the buyer, we will have all bulls re-semen evaluated in late March to insure that no winter semen damage or injury occurred.

All sale bulls are virgin bulls. All bulls have been Foot Rot and wart vaccinated as well.

## Sight Unseen Purchase Guarantee

Approval on delivery if you have purchased the bulls sight unseen with Chuck or you don't own them. If you can't make it to the sale on sale day please give any of us a call and we will gladly work with you to complete a sight unseen sale bid.

## Breeding Season Guarantee

All bulls sell with a first breeding season guarantee selling over \$3,000. The breeding season is defined as 75 days from the first day of turnout. Please see the page for details.

EPDS BW 0 WW 85 Yrlg 158  
 Milk 19 \$W 76 \$F 121 \$B 175

3F Epic 4631- This bull is powerfully made and genetically consistent with siring cattle that will perform. He ranks in the Top 1% for WW & YW, Top 3% for \$W, and Top 10% for \$F, \$B and RADG in the Angus Breed. After seeing this bull in Billings at the bull stud, we knew that he was a definitely worth all the hype. High growth and high carcass are predictable throughout. He has lived up to all the hype but unfortunately is a carrier of NH. Any bull that is listed as NHC is a carrier however a few lucky bull sons after DNA testing have been proven to be NHF and thus are registered. A NHC bull is recommended as a terminal sire while those that are NHF can be used without concern.

Evenson Stetson 100X. Everyone seems to have a 10X son, but just like in quality felt hats a 100X is better than a 10X. Just compare. The Final Product dam of Stetson is a long moderate framed milky, excellent uddered female. The main feature of Stetson is that he is a heavy muscled 10X with the masculinity and early maturity that has made Angus the top beef breed. He is an all around calving ease, maternal, carcass, growth bull - the complete package. He has proven to be calving ease, great females and carcass traits and we will continue to utilize within our herd, both A.I. and naturally. He is a CAB Targeting the Brand Bull.

# Age-Advantage Falls and 2 Year Olds

This set of Age Advantage bulls were run on their dam's or surrogate mothers from calving thru January 2020. After weaning, they were grown on a grass yearling type of ration and then placed on feed in July with the Cargil Ranger Limiter ration.

These bulls are athletic, sound, and conditioned to see heavy service. The coming late spring 2 year olds were held intentionally for this sale.

All Fall and 2 Year Olds have Actual Weights on 12/27/2020. The Scrotal Measurements are Actual As well.

We are starting the sale with the Age-Advantaged Bulls.

This particular set of bulls will be on the video screen due to their size and our sale facility pre-entry setup. All yearling bulls will go physically thru the ring as well as be on the TVs auction.

Offspring of Graff & Tumbling T Bulls  
will feed efficiently and hang a  
desirable premium carcass

Each day the sun rises and the sun sets. The beautiful skies are painted no way the same each day. The trials and tribulations that we face each day may seem insurmountable, however when we stop for a second to look up, we always marvel at the skies. The skies fill us with hope with the gentle rains when they come, make us worry as the snow flies during the biggest calving days, bundle up tight as we move cattle in the unrelenting wind, and worry unceasingly of our losses as we are pounded upon by the hail. While each day we wonder why the weather came and went, it is most likely just reminding us that he is teaching us the lessons of life - faith, hope, and belief of the wonderful things ahead that will come. So, each day when you are starting and finishing your chores take a second to thank the guy upstairs and all his angels for the lessons, they are bestowing on us.

## Memories Of Those That are Watching Over Us

Evelyn Graff, a mother and grandmother who cherished the country way of life. She was eager to follow her children, grandchildren and great grandchildren as they found their own niche in life. She fostered the love for animals and especially cattle throughout her many adventures of ranching and farming to all those around her. Now her love for quilting and checking cattle is seen through her painting of the beautiful sunsets and sunrises each day for all of us to enjoy while taking care of God's creatures. Thank you Mom and Grandma!

Jerry Speck, known far and wide as a "man of his word and handshake". Under his ownership and management Ogallala Livestock became known as the cattle market on the edge of the sandhills marketing to all corners of the United States. His impact on this area will carry on for years. He was a great man and friend.

Don Fischer, a longtime critic and admirer of area cattlemen, as well as being a top cattleman himself. He mentored many producers in an unknowingly way. When you were right he told you so and when you were wrong he also told you so to help you along.

Jerry Wrage, a man who could put a connection to anyone he ever met. He loved traveling the Sandhills for the Nebraska Farmer, Bank of Keystone, and Ogallala Livestock. His insights and stories coupled with Dean Schow, Jerry Speck, and Errol Nordhausen stories would dwarf an encyclopedia - or in today's terms Google.

Bob Paulsen, a successful longtime rancher who cared deeply for his family and community. His longtime friendship, smile, and presence was admired and will be missed. As he repeatedly said unselfishly "Don't Worry About Me".

**We are forever thankful for all of our friends and customers!  
We enjoy visiting on sale day, stopping by and spending  
a moment together throughout the year,  
working cattle together,  
and spending time in the community  
with one another.**

In-Person Viewing Of The Bulls As They Go Through The Ring!  
We Enjoy Visiting with Each of You on Sale Day!  
To help Avoid Concerns with COVID Please Stop In Anytime To View  
The Bulls Early!*

#### **Herd Feeding Program**

Graff Cattle cows are calved at Roscoe and Al'd in April and early May on cool season grass. Cows and calves go to Arthur and Keith Counties the end of May for summer grazing. This past year we weaned early September. Bull calves have been on Purina's Limited Accuration with free choice of grass hay. Heifer calves are fed hay and conditioned for AI breeding in April. Cows have remained on grass in Arthur and Keith County until the cornstalks are available in the valley for grazing until early January and then receive hay and the cycle starts again.

#### **Tumbling T Angus**

Trevor & Amy Dam - Chuck and Nancy's middle daughter and husband- have Tumbling T Angus. They ranch in Arthur County where they run Registered Angus Cattle and also have a commercial Angus herd. They run their cows on pasture, cornstalks, and supplement with hay during the winter. Their bull calves are fed at Roscoe after weaning with Graff Cattle on Purina's Limited Accuration with free choice of grass hay. Tumbling T utilizes the herd sires in their commercial Angus crop to see that the genetics are being proven and the genetics have been proven within their commercial herd with an extensive AI program and a group of embryos placed in cows each year at Tumbling T.

## **Driving the science of better breeding**

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs). EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
  - more accurate selection
  - easier identification of genetic outliers
  - the ability to propagate young animals with confidence earlier in their lives

For droid users, we recommend using the Chrome and for Apple users, we recommend using the Chrome User.

With both of these applications, users will have to go to their Play/App Store on their phone or tablet. They will type in the name of the application and download it to their device.

Once the application has been downloaded, users will need to open that application and go to [www.dvauction.com](http://www.dvauction.com). From our website, they will be prompted to login. After logging in, they can click "View" on the sale they are wanting to watch, and it will pull the sale up.

Please note, if a lightning bolt will appear in top left corner. They will have to push this button to activate the flash player. Then, they can view the video feed.

If anyone is having issues with this, they can call the office at 402-316-5460.

## Things We Are Excited About

Healthcare is something that none of us can be 100% sure about in the future! For your Long Term Care Needs, Medicare Supplements, Life Insurance and Annuity Plans call Chuck he would be glad to talk over ways that you can insure that the farm and ranch can be saved for your future generations!

If you are in need of large tire tanks or plastic T posts give Trevor a holler!

We have Arm, Barn and Semen and will travel!  
We do come out and AI for you -  
ask us about our deals!

## Breeding Season Guarantee

Please notify Graff or Dam of claims as soon as possible or before Sept 1, 2021. Bulls selling for \$3,000 and above that are injured the first 30 days will be replaced or buyer receives full credit less salvage. Bulls selling for \$3,000 and above injured from days 30 to 75 after turnout, the buyer will receive the salvage plus ½ the difference between purchase and salvage value. Death and injury due to negligence or willful mistreatment are not covered.

In addition, bulls selling for \$10,000 or more we will pay 1/2 of full mortality and injury insurance for one year if taken out on the day of the sale. For example, cost is 5% to Graff & Tumbling T for the insurance and 5% to the purchaser of the bull for one year if the purchaser desires on sale day.

## Record System

Graff Cattle and Tumbling T Angus cows are enrolled in the Angus Herd Improvement Records (AHIR) Beef Record System. Weights and adjustments are processed by AHIR. Additional data is processed according to the Beef Improvement Federation guidelines.

Thank you for your friendship,  
thank you for your patronage,  
thank you to all of our military servicemen and women, and thank  
you for that wonderful item on the table  
called BEEF- It's for dinner!

Bulls are available any time for viewing at Graff Cattle  
Video of the bulls from mid December is on DVAuction.com  
and [www.graffcattle.com](http://www.graffcattle.com). Stop in and check them out!
